

REGENERATIVE MEDICINE: ENHANCING HEALING AND PERFORMANCE

in collaboration with the Arnold Sports Festival and Neural Integrative Solutions

THURSDAY, MARCH 1, 2018

Columbus Convention Center • Columbus, Ohio

www.regonline.com/Recovery-Regeneration-Athlete-2018

SPORTS MEDICINE HEALTH CARE PROVIDERS: CLINICIANS

Injuries delay progress and can potentially end careers, and with the advancements in non-surgical solutions, health and strength can be maintained, even despite injury. Using the bodies on repairing cells, and strategically placed in injured areas, recovery is faster and performance is maintained or improved. Please join us for an informative interactive series on the latest cutting edge advancements in regenerative medicine and the impact it can have on the athlete. Attendees will also have the ability to be connected to a local regenerative medicine expert near them.

PROFESSIONAL ATHLETES AND WEEKEND WARRIORS

The medical space is changing. Treatment algorithms have shifted, focused on rebuilding injured tissue, minimizing potentially repeated harmful exposure to opioids and injectable medications. With the enhancement of technology has lead to a revolution of treatment options to restore patients to an active and healthy lifestyle, through patient derived biologics and regenerative medicine. This event will highlight evidence and application to bring these vital treatments to your community.

Dr. Eric Lee, MD. Dr. Lee, formally a professional football player with the Chicago Bears, is currently the Director of Regenerative Medicine at a Practice in Northern California, focused on returning patients and athletes back a goal achieving active lifestyle.

Dr. Tim Davis, MD. Dr. Davis serves as the medical director for Orthopedic Pain Specialists in Santa Monica, CA. He has managed and participated in many clinical trials involving many biologic treatments to improve healing and recovery, and with an international and national presence, has also been a frequent guest on the television show "the Doctors."

Dr. John Michels, MD. Our most prolific athlete, Dr. Michels works as a world renowned pain and rehabilitation specialist in Dallas, TX. Formerly a first round draft choice and Super Bowl champion with the Green Bay Packers, injury motivated Dr. Michaels to dedicate his life to helping others by contributing to the rapidly advancing felled of neuromodulation and regenerative therapies.

Co-Chair:

Dr. Jason Pope, MD: Internationally respected and key opinion leader in the health care industry focusing minimally invasive surgical options, creating a center of excellence through his practice, Thrive Clinic.

Co-Chair:

Dr. Steven Falowski, MD: Previously a natural award winning bodybuilder and currently a world leader in functional neurosurgery, he has authored numerous texts and peer reviewed journals, with expertise in deep brain stimulation, spinal cord stimulation, and minimally invasive spine surgery.
